#### **DETAILED ACTION**

The following action is in response to amendments filed February 1, 2007.

## Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-8 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The invention as claimed in independent claim 1 is directed to a series of abstract ideas and is not directed to a practical application because the claim does not require any physical transformation and, as claimed, does not produce a useful, concrete, and tangible result. The method steps of determining the commanded speed of the electric motor, determining the actual speed of the motor, determining a parameter indicative of the slip and predicting a faulted condition in the operation of the air compressor system are all claimed as abstract ideas, which is a judicial exception to 35 U.S.C. 101 and is not statutory matter for patentability.

### Allowable Subject Matter

Claims 9-16 are allowable.

The following is a statement of reasons for the indication of allowable subject matter:

The subject matter of the present invention differs from the teachings of the prior art in that the present invention according to claims 9-16 comprises in combination with the other limitations of independent claim 9 a controller comprising logic configured to determine actual slip wherein the value of the slip is defined by the relationship

Application/Control Number: 10/767,026

Art Unit: 3746

Slip: [ES – ((number of active poles of the motor / total number of poles of the motor) \* CS)] / ES,

wherein ES represents locomotive engine speed and CS represents compressor speed.

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick Hamo whose telephone number is 571-272-3492. The examiner can normally be reached on M-F 8:30-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Stashick can be reached on 571-272-4561. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
